Speaker Profile

Mr. Aarul Malaviya, Founder, MASH Virtual is a digital media enthusiast who is passionate about the use of digital media in different areas, but in specific, game development in the Virtual Reality environment and the use of Augmented Reality for specific purposes. His aim is to provide better experience to consumer with the help of digital media.

Mr. D C Pant has been in the 'business' of Education for past more than 50 years. Commencing his innings as a Lecturer in Post Graduate Colleges in Rajasthan that was followed by an overseas assignment as an Education Officer in Tanzania, he finally switched over to University administration—first in a State University, then in a Central University and lastly in the National Open University as Planning Officer, Dean of Colleges, Controller of Examinations, Finance Officer, Registrar, Director, Advisor and Pro Vice Chancellor (two terms).

He has held membership of a number of Professional and Academic bodies of reputed Institutions of Higher Education— some of which are continuing still. At National as well as at International level, he was responsible for inducting innovative approaches in Management and Administration of Universities besides introducing 'Computer Culture' in the conduct of examinations and assessment of over a million students per year.

Mr. Pant is well conversant with English, Hindi, Punjabi, Gujarati and Kiswahili and has been to London, Tokyo, Hong Kong, Bangkok, Kuala Lumpur, Dubai, Oman, Kuwait, and Lagos on official assignments besides touring Kenya, Uganda and Tanzania extensively.

A holder of double Master's Degree in Zoology and Fishes, he has to his credit three publications dealing with Distance Education, Financial Codes of two Central Universities and a few articles on different aspects concerning Management of Higher Education Institutions.

Mr. John Kerr, former CEO of Edexcel Foundation, the largest awarding body in UK, leads QAI. He is trained as a lawyer and has held positions with the London Stock Exchange and Financial Services Authority as an expert in the financial regulation and company authorisation. After leaving Pearson, John was the Operations Director with the large educational charity the Edge Foundation and commissioned 2 City academies and the Edge Hotel School. John is also an advisor and strategy consultant for a number of Government and private education bodies, both internationally and in the UK. He is an acknowledged expert in harnessing the latest technology to deliver global education solutions for the 21st century.

Mr. John Robertson is the Head of ESL and the Primary Language coordinator at Woodstock School. He has been teaching English as a second language for 12 years—in China, Canada (his country of citizenship), and India. Two years ago, he arrived at Woodstock School in the Himalayas. In his role at Woodstock, he sees the great value in students' first-language maintenance alongside English language development. He believes maintenance of students' first languages is central to a secure identity, cognitive development and second-language acquisition, and that a second language should not be a replacement for the first. Through his dual role as head of ESL and Primary Language coordinator, he is attempting to bring English second-language teaching techniques into mainstream classes, and also helping to create an inclusive environment for diverse languages and linguistic backgrounds. John understands both of these to play an important role in helping students develop both strong identities and the linguistic depth required for critical thought.

Prof. M.M. Pant, Founder LMP Education Trust and an internationally renowned expert specialising in pedagogy, technology and the development of tools and curricula for 21st Century Education through a framework titled "Learning 221- Learning for the 2nd decade of the 21st Century. His current work and interests revolve round the development, delivery and promotion of educational products, processes and services that cater to the needs and interests of future learners. Especially noted for his efforts in leveraging Social Media for improving learning and bringing the 'traditionally banned' mobile and handhelds into the classroom, Prof Pant conceived the idea of transforming Indian Education through MOOCs and launched "May a thousand MOOCs bloom' to make it a reality. He is an enviable combination of teaching, technology and transfer of tools for the benefit of worldwide learners taking advantage of possibilities offered in MOOCs.

Saturday, 15th April 2017 | Leveraging English Language to Enhance Subject Learning (updated as on 11th April 2017)

Venue: Air Force Auditorium, Subroto Park, New Delhi

Ms. Vijaya Padma Srinivas has experience in customer service, event management and marketing but specializes in developing and conducting training programs and workshops. She has conducted a variety of workshops/training programs for children, young adults and adults on topics ranging from business communication to train-the-trainer programs for organisations such as Cambridge English Language Assessment, British Council, Times of India, Sheraton group of hotels etc. She has authored 4 children books and written articles for general interest magazines and English language publications.

Having achieved the elusive 'A' grade on the Certificate for English Language Teaching for Adults, she has also secured a credit in her second master's degree – a Masters in Training and Development from the University of New England.

Currently Vijaya leads on Assessment Services at Cambridge English Language Assessment for South Asia, Middle East, Turkey, Russia and Africa. Over her years with Cambridge English, Vijaya has lead on several English language projects, been instrumental in the training of thousands of teachers, created extensive training/learning content and engaged with syllabus review among other academic related activities.
